THE BEST
IN BUILDING
SOLUTIONS

ENGLISH

All-round expertise produces synergy effects

PREMIUM QUALITY. JUST-IN-TIME ON SITE.

Profit from our
all-round expertise

We build on quality, efficiency and safety. You too? If so, you've come to the right place. Whether quick-mix, AKURIT, tubag, strasser or hahne – all of our brands stand for premium construction materials that are top-notch when it comes to application safety, process efficiency and profitability. And our in-house logistics means we can secure punctual, on-the-spot deliveries.

Sievert Baustoffe is a subsidiary of Sievert SE, a more than 100-year-old family-run business. The expertise of our five premium brands in the construction materials sector is concentrated under its roof. This leads to extra value added for you: synergy effects resulting from our experience in various trades. An innovative spirit and a naturally evolved expertise that benefits both professional tradesmen and the trade as well as architects and building contractors alike.

Efficiency, profitability, quality

Lohr Civic Hall/quick-mix

THE BEST THE MARKET HAS TO OFFER

Premium quality
– from construction
materials to system
solutions

The success of a project is decided by the details. Which is why we have a distinct quality claim for every single one of our construction materials: the best the market has to offer. But we have now gone one step further and developed our portfolio of high-quality products into system solutions for specific applications. Thus guaranteeing our customers greater efficiency and profitability.

State fire-fighting academy, Würzburg / AKURIT

St. Konrad daycare centre, Neuss / tubag

Our specialists for every case

FASTER, BETTER, MORE EFFICIENT

Five brands, only one contact

sievert construction materials

quick-mix

quick-mix is the market leader for mortar and also stands for high-quality concrete and repair systems. quick-mix is repeatedly setting standards, for example with top products such as V.O.R. masonry mortar or the grout with Secon® technology.

akurit

AKURIT is the leading specialist for plasters and external thermal insulation composite systems. Under the motto "Achieving more within a system", the brand offers premium construction materials that are perfectly matched and can thus be processed quickly, easily and safely.

tubag

tubag is inseparably linked with Rhineland trass. The brand is the market leader in the gardening and landscaping sector as well as for the rehabilitation and restoration of historic buildings. It is also synonymous with quality in road construction.

strasser

strasser can offer professional tile layers and the specialised trade tiling and flooring systems for almost every need. Thanks to its expertise in systems, strasser can help its customers with personal advice at all times.

hahne

hahne offers the very finest for the professional protection of buildings. From chemical building products through to innovative system solutions and technical advice, our customers receive a comprehensive service package for new buildings and rehabilitation work.

A house full of leading construction material brands: the company headquarters in Osnabrück.

Maximum service – in every phase of your project

The crème de la crème need the best products and systems.
Which is why our AKURIT brand supports the national stucco workers team.

OUR GUIDES: OUR CUSTOMERS

Individual solutions for professional tradesmen,
architects, the trade and property developers

No matter how different building projects may be, they all have one thing in common: numerous stakeholders are involved in the value creation chain, architects and professional tradesmen as well as the trade and property developers. We have developed extensive services tailored to the needs of all of these customers that bring them noticeable competitive advantages.

WE TURN CHALLENGES INTO ARCHITECTURE

A project-related service that takes
your demands into special consideration

You face new challenges in every building project. We are here to help you throughout the entire project period – with construction materials that lead the way in terms of design, technology and ecology. And we will be happy to advise you in the first phase of your project with samples and technical information.

What's more, you profit from numerous services throughout the entire period – from the calculation of quantities and determination of moisture, specifications and detailed drawings, right through to project-related services and the development of individual logistics solutions.

Our flexibility, expertise and a particular affinity with your needs accompanies architects, planners and property developers throughout the entire life of a building project.

TRASS PRODUCTS PROVIDE NEW SPLENDOUR

Rehabilitation of the
Saint-Marie-Madeleine
basilica in Vézelay / tubag

The 850-year-old basilica – one of the most visited churches in France – was in need of rehabilitation in line with listed building regulations. Several of tubag's products were used during this work. Trass powder was mixed into the wall plaster as protection against efflorescence and discolourations. For the outdoor paving, the decision makers trusted in the tubag products TCE Trass-Compound, TNH-flex and the colour-matched paving grout PFF.

Intelligent solutions for professional tradesmen

Professional tradesmen appreciate our expertise in systems and the outstanding workability of our products.
Tailwind for our trade partners.

EFFICIENCY THROUGH PROFESSIONAL SERVICE

We have you covered
with intelligent solutions

As a professional tradesman, you face new problems in every building project. So it's good to know you can rely on products that are very easy to process and offer the greatest possible safety during application. Sievert products.

We will also be happy to provide both personal and individual advice on your project. Based on our many years of experience, we come up with intelligent solutions that leave you free to get on with your work.

PROTECTION AGAINST EFFLORESCENCE AND LEACHING

Chimney renovation at the
Zeche Zollverein /
quick-mix

A perfectly matched mortar system of V.O.R. masonry mortar and the new S-FM grout was used in the rehabilitation of one of the six majestic chimneys at the former Zollverein coal mine in Essen. The patented SECON® binder technology of the quick-mix S-FM grout offers reliable protection against efflorescence and leaching from the grout.

FASCINATING OUTLOOKS

We take quality seriously.
Because it’s about people.

No matter whether an industrial, office or residential building – we consider every building project from the end, in other words, from the point of view of the people who will some day enter and leave the building.

Will they feel at ease? Is the design both varied and functional? But also, are the products that have been used of a top quality and do they make for healthy living? Is there a harmonious symbiosis of architecture and construction materials?

In short: does the building offer space for the best possible quality of life?

These are important questions that decide the actual long-term value of a building. This is what matters for us. Because it’s all about people.

If a building offers some fascinating outlooks in every direction, then the harmonious combination of architecture and premium construction materials has been a success.

HISTORIC FAÇADES BEAUTIFULLY RENOVATED

Energy-efficient rehabilitation of Günzburg Castle / AKURIT

The agenda for the rehabilitation also included the improvement of the energy balance. A classic external thermal insulation composite system could not be used for optical reasons. After a thorough examination, the responsible Krumbach Building Authority decided on TRI-O-THERM M, the multi-award-winning, high-insulation lightweight plaster from AKURIT.

A scientist in a white lab coat and safety glasses is working in a laboratory. The background shows shelves with various bottles and a robotic arm. The scene is brightly lit, suggesting a clean and modern research environment.

We've got the quality

LEADING THROUGH INNOVATION

We are driven to always
provide the best construc-
tion materials for you

The Research & Development department is the motor in our company. It is where we develop and are constantly improving products to cater for your individual needs. The main goal of all developments: the greatest possible design flexibility for architects, maximum processing comfort for professional tradesmen and the security of top-quality construction materials for building contractors.

WE DELIVER QUALITY: JUST IN TIME.

We ensure the smooth
progress of projects

Bringing the exact amount of products to precisely where they are needed just in time – all thanks to our affiliate Sievert Logistik SE. We supply specialist and DIY stores as well as building sites with our complete range – either loose or on pallets, top quality construction materials for every intended application, natural stone and concrete paving, gypsum plasterboards or insulation materials.

To help us with our work, we can rely on a modern fleet of vehicles with special equipment such as truck-mounted cranes and fork-lift trucks or silo vehicles. We also trust in the latest digital technologies for dispatching and the entire order processing. The digitisation of our around 15,000 mobile silos throughout Germany that is being carried out under the name “iSilo®” allows us to call up important operating data centrally, such as filling levels, temperatures or GPS data.

At your request, we can also develop individual logistics solutions and organise your complete intermodal logistics chain.

WE SECURE YOUR SMART PROCESSES

Digital services mean
greater efficiency

Customer focus for us means understanding your needs and developing solutions that ensure greater efficiency for you. This is why we focus firmly on the digitisation of services along your entire value creation chain. From counselling through to final acceptance of the building, you profit from services that guarantee faster and more efficient processes in terms of planning, handling, processing and logistics.

MAXIMUM PERFORMANCE THROUGH MAXIMUM FLEXIBILITY

Our Supply Chain
Management secures
the availability of goods

Every year, our 33 German and 7 foreign locations supply our national and international customers with millions of tons of construction materials. These huge product flows are controlled through a network of local production facilities, logistics centres and regional sales offices with the help of a professional Supply Chain Management system. This gives us the flexibility we need to provide the best possible performance: we secure that our goods will be available at all times, even if your demand rises at short notice.
