## Protecting Values All Round

For more than 90 years, hahne has stood for building chemical system solutions for new buildings and renovations. The protection and conservation of the building fabric is one of our main goals. Whoever works with hahne systems is a true professional, relies on a trend-setting product range with excellent processing properties and the highest quality standards.

Committed to progress, hahne is constantly developing new product solutions for the protection of buildings.

### Building materials for today and tomorrow. **Sievert Green Line.**

Today's building materials must leave nothing to be desired in terms of efficiency, processing safety and performance. Building materials for tomorrow also take into account the concept of sustainability. The new Sievert Green Line reconciles short- and long-term requirements and is our seal of approval for **building materials for today and tomorrow.**

The question of when a building material is sustainable cannot simply be answered with yes or no. Therefore, we have developed an evaluation scheme with nine criteria, which pay attention to the sustainability of a product. On this basis, products were identified that already set standards in terms of performance and sustainability – the Sievert Green Line. In addition, we are now in a position to systematically identify potential for improvement in order to further develop our products and thus offer an ever-growing sustainable product portfolio in the future.

It is our ambition to make the construction industry more sustainable and to achieve climate neutrality by 2030. With the Sievert Green Line, we are putting this claim into practice. We transparently show where we stand and which path still lies ahead of us in order to offer a 100% generation-friendly building experience in the future.

# We are Sievert

Founded in Osnabrück in 1919, Sievert is still a family-run company today. The cross-generational experience makes Sievert SE a leading specialist in the building materials and logistics industry.

With our approximately 1,700 employees, we are active at 60 locations in Germany, Europe and China. Every day, we work to create the best conditions for our customers' construction projects and to enable intelligently networked logistics.

The competence of our premium brands quick-mix, akurit, tubag, strasser and hahne is bundled under the Sievert umbrella in the building materials division. Sievert Logistik SE ensures that your goods arrive at the right place at the right time.
